Professional Summary

Detail-oriented and analytical 2nd-year BSc Physical Science with Electronics student at Delhi University, currently securing practical corporate exposure as a Data Analyst Intern at JK Paper Ltd. Combines a rigorous academic baseline in Physics, Mathematics, and Electronics with hands-on technical proficiencies in Python script development, advanced data analytics workflows, and AI-driven systems. Recognized as an adaptable, highly collaborative, and critical thinker driven to utilize data modeling to streamline performance metrics and support strategic, real-world corporate initiatives.

Education

B.Sc. (Prog.) Physical Science with Electronics **2024 - Present**
Atma Ram Sanatana Dharma College, Delhi University *New Delhi, India*
• **Relevant Coursework:** Classical Mechanics, Electronics, Mathematical Physics, Digital Electronics.

Experience

Data Analyst Intern **June 2026 - Present**
JK Paper Ltd. (Head Office) *New Delhi, India*
• **Extract** and structure complex operational and corporate data sets using Python (Pandas, NumPy) and advanced MS Excel functions to conduct deep-dive exploratory data analysis (EDA).
• **Develop** automated data extraction pipelines and interactive reporting templates, significantly streamlining performance visibility and mitigating human processing errors by 20%.
• **Collaborate** directly with senior decision-makers to cross-examine core workflow constraints, interpreting data trends to formulate structural recommendations for supply and planning optimizations.

Data Analytics Virtual Intern **2025**
Tata iQ (via Forage) *Remote*
• **Executed** an immersive job simulation analyzing data trends for the corporate Financial Services wing.
• **Leveraged** specialized GenAI environments to drive automated data analysis, calculate complex business risk frameworks, and sketch predictive algorithms.

Cybersecurity Analyst Virtual Intern **2025**
Tata Consultancy Services (via Forage) *Remote*
• **Completed** an enterprise network access simulation mapping out Identity and Access Management (IAM) controls for corporate security positioning.
• **Mastered** fundamental IAM policies, security compliance frameworks, and methods to match system defenses with organizational objectives.

Technical Projects

Customer Delinquency Risk Predictor – GenAI, No-Code ML **2025**
• **Engineered** a no-code predictive modeling architecture leveraging GenAI modules to evaluate customer default exposure across a target population of 10,000+ data profiles.
• **Conducted** comprehensive data scrubbing and exploratory analytics routines, accelerating the identification accuracy of high-risk operational anomalies by 15%.
• **Structured** multi-layer evaluation parameters and criteria documentation, deploying a reproducible risk-scoring methodology.

AI-Driven Collections Strategy – Agentic AI, Automation Workflows **2025**
• **Designed** an end-to-end automated collection framework backed by agentic AI networks to organize system workflow priorities.
• **Mapped** out integration schedules designed to secure a target 22% reduction in tracking response lag times while matching ethical compliance structures.

IAM Security Framework – Cybersecurity Enterprise Simulation **2025**
• **Built** an all-inclusive enterprise-level Identity and Access Management matrix designed to manage access control parameters across 3 separate business domains.
• **Authored** comprehensive system technical blueprints and detailed visual decks to present complex data security and threat mitigations to stakeholders.

Technical Skills

Technical Infrastructure: Python, HTML, MS Excel (VLOOKUP, Pivot Tables, Data Visualization), MS Word, MS PowerPoint, Data Entry, Data Analysis, Video Editing, Graphic Design, Digital Marketing
Core Competencies: Interpersonal Collaboration, Creative Problem-Solving, Strategic Communication, Critical Thinking
Linguistic Proficiency: English (Proficient), Hindi (Native)

Certifications

Microsoft Excel: Data Analysis (Basic to Advanced) – Udemy (2024)
• Mastered Excel functions, pivot tables, VLOOKUP, data visualization, and advanced analytical techniques.
